No.31 Summer 2016

[Customer Solutions Special]

- **Greeting** Senior Executive Officer Director of Corporate Research and Development Group Mutsuo Aoki
- **Commentary** Customer Solutions and Evaluation Technologies
Corporate Research and Development Group Development Division General Manager Takaharu Ikeda
- **Technical Papers** Gasket Clamping Problems and Their Solutions
Corporate Research and Development Group Development Division Takahiro Fujihara
Large Diameter Gland Packing Installation Problem Examples and Installation Guidelines
Corporate Research and Development Group Development Division Masato Hamade
Causes of Blister Problems Resulting from High-pressure Gas and Highly Volatile Liquids
Corporate Research and Development Group Development Division Hirofumi Zushi
Causes of O-ring Transfer Problems and Their Solutions
Corporate Research and Development Group Development Division Ryosuke Nishi
Lining Pipe Problem Examples Corporate Research and Development Group Development Division
High Performance Plastics Development Division Technical Service Section No.1 Yoshifumi Kutsuzawa
Explaining the PTFE Linear Coefficient of Expansion Corporate Research and Development Group Development
Division High Performance Plastics Development Division Technical Service Section No.3 Nobuyuki Ota
- **Contribution** Characteristics of Hydraulic Cylinders Used in Standard Industrial Machinery and
Their Seal System Problems—Responding to the MRO Market
TAIYO,LTD. Toshinori Ueda

No.30 Winter 2016

[Core Japanese Industry-Supporting Elastomer Products Special Issue]

- **Greeting** President & CEO Toshikazu Takisawa
- **On Issuing the Core Japanese Industry-Supporting Elastomer Products Special Issue**
Senior Executive Officer Director of Corporate Research and Development Group Mutsuo Aoki
- **Technical Papers** High-pressure Hydraulic Seal Systems
Corporate Research and Development Group Development Division Zyunichi Yamashita
Low-torque Seals for Rotating Joints
Corporate Research and Development Group Development Division Akihiro Nagano
- **Product Introduction** Developing Radiation Resistant Elastomer Products—High-functional EPDM H3070 and H0880
Corporate Research and Development Group Development Division Ken Suzuki
Elastomer Products for Industrial Machinery
Corporate Research and Development Group Development Division Mitsuru Minami
Elastomer Products for the Beverage Industry
Corporate Research and Development Group Development Division Masanori Okazaki
High-Functional Perfluoroelastomer Products
Corporate Research and Development Group Development Division Naoki Oosumi

No.29 Summer 2015

[Soft Gasket Special Issue]

- **Greeting** Senior Executive Officer Director of Corporate Research and Development Group Mutsuo Aoki
- **General Remarks** Changes in the Social Environment Surrounding Gaskets
Seal Sales Group Technical Solution Division Hajime Nonogaki
- **Technical Papers** Surface Pressure Behavior in Gasket Connections and the Effects of Tightening
Solution Development Group Kazuya Kurihara
Predicting Long-term Behavior in Fluorocarbon Resin Gaskets Using Finite Element Analysis
Corporate Research and Development Group Development Division Development Group Kouji Satou
- **Product Introduction** An Introduction to High-Functional Seal Gaskets and Their Different Uses
Corporate Research and Development Group Development Division Development Group Shinya Kurokawa
- **Contribution** On the Sealing Behavior of Pipe Flange Connections with Joint Sheet Gaskets
Professor Emeritus at the University of Hiroshima Toshiyuki Sawa
